**MARCODEGIOVANNINI**

MARCO LLC is an innovative architecture and integrated design practice.

We strive to provide the highest quality professional service in architecture, urban design, interior, landscape, industrial design and digital visualisation.

This is what we do and we do it with passion and dedication with a pragmatic approach that does not exclude creativity but quietly allows us to go through the largest projects.

We think architecture is a personal and individual definition of the spaces through volumes and voids commonly qualified by the aesthetic view of the multitude. Architecture is not a dream but is indeed generated in the oneiric space of our minds and through a specific path of research can lead to the object we all can see, that surrounds us in every aspects of our lives.

The context, defined by its specific sociological, economical, urbanistic and morphological aspects matters as the background color of a page and we want to write architecture with creativity, contrasts and elegance, exalting the quality of our lives. So we contextualize every design in its own larger environment.

We always start defining “the concept” in order to give solidity to our ideas. Then we evaluate and disprove our minds into a debate that generates the initial sketch as the first step of the design process.

We focus on research, diversity, innovation and sustainability with imagination and artistic approach, shaping and sculpting our ideas into significant objects.
